

Office Ergonomics

Services, Software, and Training

Simple solutions for offices big and small

No matter the size of your organization, Atlas has the most complete solution available in the industry. We deliver leading ergonomic services, software, and training that are simple, efficient, and cost-effective. Best of all, we provide local support for over 10,000 cities and towns nationwide in a uniquely simple way.

We Start With Software

AtlasOffice™ is our simple, web-based office ergonomics solution that's customized to fit the unique needs of your organization. AtlasOffice™ gathers risk data from your employees and delivers general and personalized web-based self-improvement education. Plus, AtlasOffice™ facilitates telephonic or onsite assessments if needed, and manages and measures the performance of your office ergonomic program.

We Develop Design Standards

Atlas can work with you to develop office furniture design standards and standard product lists to select from when making product recommendations. The standards ensure the products you use meet ergonomic design standards, are consistent so employees feel they are all being treated equally, and offer the potential for better pricing based on volume discounts

We Provide Onsite and Remote Support

As a company, Atlas believes people in real pain need real people. Atlas software and services facilitates human interaction for higher risk situations. We can come to you. Our nationwide network of ergonomics specialists can meet with your employee to

confirm their risk factors, develop a recommendation plan, implement immediate solutions if possible, and train your employee on equipment use and how to avoid an injury. For employees in hard-to-reach areas, Atlas provides web-based telephone support. Through the media upload capability within AtlasOffice™, our trained experts can review employee-supplied pictures and video to provide the most accurate recommendations and support possible.

We Provide Full-Service Support

If you don't have time to manage all of the elements an effective ergonomic assessment requires, Atlas offers a full-service support option. We communicate with individuals on the steps required to initiate an ergonomic assessment, and we follow up with each individual to ensure the ergonomics plan has eliminated discomfort or related workstation issues. Plus, we provide final reports to the people who need them. We help ensure the success of your ergonomics program when you don't have the time to do so.

We Offer Affordable Solutions

AtlasOffice™ comes with all the office ergonomic options you need at a fraction of what you'd pay for similar programs. In fact, if you're a large organization exclusively using Atlas for telephonic and onsite assessments, AtlasOffice™ can even be free.

Exceptional Ergonomics Training

If you want your own staff to be self-sufficient, we can provide the needed training including:

- Managing an Ergonomics Process
- Ergonomics Subject Matter Experts or Team Training
- Ergonomics Awareness for Supervisors and Managers

Need a simple and effective plan to address your office ergonomic risks? Give us a call or send us an email. We offer customized, cost-efficient office ergonomics plans built to fit and deliver results.
